

# Hassan Mohamed

Cybersecurity Student | Aspiring Penetration Tester | Networking & Linux

El Betash, Alexandria, Egypt | 01285029334 | hassanhameed153@gmail.com

---

## PROFESSIONAL SUMMARY

Cybersecurity student at Alexandria University working toward a role as a Junior Penetration Tester, with a longer-term goal of becoming a specialized security consultant. Actively solves labs and CTF challenges on TryHackMe and HackTheBox using a personal Kali Linux setup. Comfortable working in Linux command-line environments, with practical exposure to advanced networking concepts, Docker containerization, and reverse engineering. Complements this with a solid programming foundation across Python, Java, JavaScript, and PHP.

## PROJECTS

### Port Scanner

*Python*

- Developed a custom Python script to scan hosts and identify open ports, applying core networking and socket programming concepts.

### Metasploitable Exploitation Walkthrough

*Kali Linux, Metasploit Framework*

- Enumerated and exploited the Metasploitable vulnerable VM end-to-end, identifying and leveraging misconfigurations and known vulnerabilities to gain access.

### CTF & Practice Platforms

- TryHackMe: Solved a wide range of rooms and labs covering networking, Linux fundamentals, web exploitation, and privilege escalation.
- HackTheBox: Recently started working through machines and challenges to build practical offensive security skills.

## EXPERIENCE

### Network & Cyber Security Intern

2026

*Academic Key — Online*

- Completed a 20-hour hands-on internship in Network & Cyber Security, covering core networking fundamentals and cybersecurity principles.
- Built foundational knowledge supporting an ongoing specialization toward penetration testing, including exposure to network defense concepts.

### IT Department Intern

July 2026

*Ezz Dekheila Steel Co. (ezzsteel) — Alexandria, Egypt*

- Completed the ezzsteel Internship Program 2026 (12–23 July) within the IT department of a large-scale industrial company.
- Learned how the company's IT operations run day-to-day and gained hands-on exposure to how enterprise networking is set up and managed.
- Observed and studied real IT and networking projects, building practical understanding of infrastructure in a production environment.

## SKILLS

- Cybersecurity & Networking: Network Security fundamentals, Advanced Networking concepts, Linux (Command Line), Reverse Engineering, Penetration Testing (in progress)
- Security Tools & Platforms: Kali Linux, VirtualBox, Metasploit Framework, Nmap, Docker, Git, TryHackMe, HackTheBox
- Programming & Development: Python, Java, JavaScript, PHP
- Web Development: HTML, CSS, JavaScript (Front-end & Back-end)
- Database Management: MySQL, Oracle
- Computer Skills: ICDL Certified
- Languages: English (B2 Level)
- Soft Skills: Teamwork, Collaboration, Problem-Solving

## EDUCATION

### Alexandria University – Faculty of Science

2023 – Present

*Department of Computer Science & Mathematics — Undergraduate, Second Year*
